

Autumn 2022

Regional Water Resources Plan—Eastern and Midlands

Irish Water’s 25 Year Plan for Our Water Assets

Volume 1 (of 2)

Tionscatal Éireann
Project Ireland
2040

Data disclaimer: This document uses best available data at time of writing. Some sources may have been updated in the interim period. As data relating to population forecasts and trends are based on information gathered before the Covid-19 pandemic, monitoring and feedback will be used to capture any updates. The National Water Resources Plan will also align to relevant updates in applicable policy.

Baseline data included in the RWRP-EM has been incorporated from numerous sources including but not limited to; National Planning Framework, Central Statistics Office, Regional Spatial and Economic Strategies, Local Authority data sets, Regional Assembly data sets and Irish Water data sets. Data sources will be detailed in the relevant sections of the RWRP-EM. 2019 was selected as the base year to align with the planning period (2019-2025) of the NWRP. Table of Contents

1	Planning Context	1
1.1	Introduction	2
1.2	Who We Are	3
1.3	Water Supply in the Eastern and Midlands Region	3
1.4	Development of the National Water Resources Plan	4
1.5	RWRP-EM	7
1.6	Scoping and Screening for Eastern and Midlands Region	8
1.7	Study Areas	8
1.8	Overview of RWRP-EM	9
1.9	Strategic Environmental Assessment and Appropriate Assessment	10
1.10	Summary of Policy	11
1.11	Stakeholder Engagement and Consultation on the RWRP	11
1.12	Baseline Data	11
1.13	Summary	14
1.14	References	14
2	Eastern and Midlands Region	15
2.1	Introduction	16
2.1.1	Regional Overview	16
2.1.2	Study Areas in the RWRP-EM	17
2.2	Growth and Development	19
2.2.1	Current Population	19
2.2.2	Growth and Economic Development Policies	20
2.2.3	Population Forecasts in the RWRP-EM	22
2.2.4	Tourism and Recreation	25
2.2.5	Impact of the Covid-19 Pandemic	26
2.3	Natural Resources	26
2.3.1	Geology	28
2.3.2	River Systems	29
2.3.3	Groundwater	30
2.3.4	Groundwater – Surface Water Interaction	32
2.3.5	WFD Ecological Status of Waterbodies	32
2.3.6	WFD ‘Risk Status’ of Water Bodies and Associated Pressures	36
2.3.7	Abstraction Pressures	38
2.3.8	Designated Sites in the RWRP Eastern and Midlands Region	41
2.3.9	Opportunities for Protection, Restoration and Enhancement	43
2.4	Water Supply	45
2.4.1	Rainfall	45
2.4.2	Drought	56
2.4.3	Hydropower	48
2.4.4	Flood Risk	49
2.4.5	Water Supply Systems	49
2.4.6	Climate Change	50
2.5	Summary	57
2.6	References	58

3	Regional Needs	61
3.1	Introduction	62
3.2	Water Quantity	65
3.2.1	Introduction	65
3.2.2	Current Water Supply	69
3.2.3	Hydrological Yield	72
3.2.4	Current and Future WAFU	74
3.2.5	Current Demand	78
3.2.6	Demand Forecast	80
3.2.7	Supply and Demand Balance	87
3.2.8	Summary	96
3.3	Water Quality	98
3.3.1	Water Quality Compliance	98
3.3.2	Barrier Assessment – DWSP Approach	100
3.3.3	Barrier Assessment – Summary	101
3.4	Water Supply Reliability	104
3.5	Water Supply Sustainability	105
3.6	Summary	108
3.7	References	109
4	Current Status of Infrastructure	110
4.1	Introduction	111
4.2	National Investment Programmes	111
4.3	Progress in the Eastern and Midlands Region	112
4.3.1	National Investment Programmes	112
4.3.2	Identification of Critical Infrastructure Projects	113
4.3.3	Completed Critical Infrastructure Projects	114
4.3.4	In-Flight Critical Infrastructure Projects	118
4.4	Summary	120
4.5	Conclusions	124
4.6	References	124
5	Solutions – Our Approach	125
5.1	Introduction	126
5.2	Lose Less: Leakage Reduction	126
5.2.1	Three Step Leakage Reduction	127
5.2.2	Leakage Targets and Demand Forecasting	129
5.2.3	Challenges in Meeting Leakage Reduction Targets	131
5.2.4	Leakage Reduction in Athlone Town	131
5.3	Use Less: Water Conservation	132
5.4	Supply Smarter	137
5.5	Summary	138
5.6	References	138

6	Option Development	139
6.1	Introduction	140
6.1.1	Option Scale	140
6.1.2	Option Development Process	146
6.1.3	Unconstrained Options	147
6.2	Option Screening	149
6.2.1	Coarse Screening	149
6.2.2	Fine Screening	151
6.2.3	Rejection Summary	153
6.3	Feasible Options	155
6.3.1	Feasible Option Types	155
6.3.2	Other Consideration in terms of Supply Solutions	159
6.3.3	Option Costing	159
6.4	Project Level Summary	160
6.4.1	Data Review	160
6.4.2	Project Development	161
6.4.3	Project Level Assessments	161
6.4.4	Next Steps	161
6.5	Summary	162
6.6	References	162
7	Preferred Approach – Study Area	163
7.1	Introduction	164
7.2	Approach Development Process	165
7.2.1	Approach Categories	165
7.2.2	Approach Ranking and Appraisal	167
7.2.3	Stage 1 – WRZ Level Approach	169
7.2.4	Stage 2 – Study Area Combinations	177
7.2.5	Stage 3 – Study Area Level Preferred Approach	179
7.3	WRZ Level Approach and SA Preferred Approach	185
7.3.1	Approach Description	185
7.3.2	Assessment against the Six Approach Categories	192
7.3.3	Cost Comparison	197
7.4	SA Preferred Approach	198
7.4.1	Water Supply Sources	198
7.4.2	Changes to Existing Infrastructure	200
7.4.3	Addressing Leakage	206
7.4.4	Addressing Water Quality	207
7.4.5	Environmental Sustainability	207
7.5	SA Preferred Approach Summaries	212
7.5.1	Study Area 1 – Wicklow	213
7.5.2	Study Area 2 – West Wicklow	215
7.5.3	Study Area 3 – Meath	217
7.5.4	Study Area 4 – West Meath	219
7.5.5	Study Area 5 – Offaly/Roscommon	221
7.5.6	Study Area 6 – Laois	223
7.5.7	Study Area 6 – North Tipperary	225
7.5.8	Study Area 6 – Limerick Clare	227
7.5.9	Study Area 9 – Greater Dublin Area	229
7.6	Interim Solutions	231
7.6.1	Study Area 1 to Study Area 8	231

7.6.2 Study Area 9 (Greater Dublin Area)	233
7.7 Sensitivity Analysis	234
7.8 Review of Preferred Approaches arising from Consultation	237
7.8.1 Barndarrig (Study Area 1)	237
7.8.2 Rahan WRZ (Study Area 5)	237
7.8.3 Mountbolus WRZ (Study Area 6)	238
7.8.4 Upperchurch WRZ and Killaloe WRZ (Study Area 8)	238
7.8.5 GDA WRZ (Study Area 9)	239
7.8.6 Updated Leakage Targets	239
7.9 Summary	239
7.10 References	240
8 Regional Preferred Approach	241
8.1 Introduction	242
8.2 Combination 1 – Regional Approach with Transfers	243
8.2.1 WRZs where the Preferred Approach is to Obtain Supply Directly from the GDA	243
8.2.2 WRZs where the Preferred Approach is to Obtain Supply from the NSS	248
8.2.3 Total Supply Required	255
8.2.4 Summary of Combination 1 – Regional Approach with Transfers	256
8.3 Combination 2 & 3 Regional Approaches without Transfers	257
8.4 Approach Appraisal	266
8.5 The Regional Preferred Approach	270
8.6 Sensitivity Testing of Regional Approach	274
8.7 Benefits of the Regional Preferred Approach	277
8.8 Summary	277
8.9 References	278
9 Ongoing Monitoring, Mitigation and Evolution	279
9.1 Introduction	280
9.2 Monitoring and Mitigation	280
9.2.1 Identifying Internal and External Factors that may Impact the NWRP	283
9.2.2 Needs Identification	285
9.2.3 Feedback	285
9.3 Future Actions	286
9.4 References	286

10	Conclusions	287
10.1	Introduction	288
10.2	Baseline of the Public Water Supplies in the Eastern and Midlands Region	288
10.3	Plan Development	289
10.4	Plan Outcome	291
10.5	Benefits of the Preferred Approach for the Eastern and Midlands Region	291
10.5.1	Reducing Quantity Risk	291
10.5.2	Reducing Risk to Water Quality	293
10.5.3	Reliability and Sustainability	294
10.5.4	Abstraction Pressures and Water Framework Directive	296
10.5.5	Transformation	297
10.5.6	Alignment with Policy	299
10.5.7	Alignment with Investment Planning	299
10.6	Alternatives to Plan	300
10.7	Interim Options	301
10.8	Conclusions	301
